**Introduction**

Creating memories and joyous experiences for consumers is a key dimension affecting the profitability and growth of any tourism organisation. To understand the factors that influence customers’ decisions is invaluable in marketing and operating your travel and tourism business.

This unit is designed to enhance students’ knowledge and understanding of the consumer’s decision-making processes, from needs recognition through research, the evaluation of alternatives, purchase and post-purchase evaluation. While students will learn the underpinning theories and frameworks, they will also be expected to relate these to real-world examples, including their own personal experiences.

An important part of marketing is understanding the processes behind how a consumer makes the decision to purchase a product and/or service.

The knowledge, understanding and skill sets that students will gain on successfully completing this unit will enhance their career opportunities, whether setting up in business independently or being employed by a travel and tourism organisation.
Learning Outcomes

By the end of this unit a student will be able to:

1. Examine the factors that influence tourism consumer behaviour and attitudes
2. Demonstrate the ability to map a path to purchase in a tourism context, including the decision-making process
3. Evaluate appropriate forms of research to understand influences on the tourism consumer decision-making process
4. Evaluate how marketers influence the different stages of the tourism consumer decision-making process.
